

## **Senior's Health Care**

WHEREAS Saskatchewan and the rest of Canada are experiencing demographic growth of people in their senior years (>65) age category;

WHEREAS an infant born today in Canada has a life expectancy of 100 years;

WHEREAS senior housing in Saskatchewan has recently shown a lack of investment by the Province;

THEREFORE, BE IT RESOLVED that a Saskatchewan Liberal government will advocate for expanded senior health care, a prescription drug plan for seniors, and the expansion of home care.
