

## **Infrastructure for United Communities**

WHEREAS Saskatchewan resources need to make it to market to be of value to the Saskatchewan people;

WHEREAS the Sask Party government claims to advocate for pipelines but does not act on its rhetoric;

WHEREAS expanding infrastructure will create short-term and long-term jobs for all communities in Saskatchewan;

WHEREAS recent failed pipeline projects have relied on transiting through either Quebec or British Columbia;

THEREFORE, BE IT RESOLVED that a Saskatchewan Liberal government will invest in infrastructure initiatives to get Saskatchewan goods and resources to market such as, but not limited to, the port of Churchill.

BE IT FURTHER RESOLVED that a Saskatchewan Liberal government will work in partnership with First Nations, Métis communities, municipalities, and rural municipalities to develop and operate a pipeline and rail network servicing Saskatchewan and terminating in the port of Churchill.

BE IT FURTHER RESOLVED that a Saskatchewan Liberal government will also work collaboratively with the federal government and the governments of Alberta and Manitoba to provide a path to get prairie resources to market.
